

How to get the maximum impact of high-tech laser lighting

There is nothing like the pure color and pencil-thin shafts of laser light, to wow an audience. And the world experts in laser displays are ILDA Members. If you are looking for the best in laser shows and equipment, contact one of our Corporate Members.

ILDA Corporate Members companies create laser shows and installations, for venues that include discos and nightclubs, theme parks, planetariums, special events, concerts, and corporate shows. Some also provide additional production services such as lighting, special effects, waterscreens, fireworks, lighting, etc. And we have members who supply lasers, laser projectors and related equipment, lasershow software, and art production services.

In the alphabetic list which starts on the next page, some companies are highlighted with larger and bolder type. These are Level 1 and Level 2 members, who pay more dues to ILDA based on their reported annual sales. Details are in the footnote on the left-hand pages.
