

Hi, you were probably looking for Version 2.1 of the “Lasers and Aviation Safety” paper that was presented at ILSC 2009 and other conferences.

The information in the paper has been updated. For the latest version, look on one of these two webpages. Both places should have links to the same (most recent) version:

ILDA website, <http://www.laserist.org/safety-info.htm> Scroll down to the section “Lasers and aviation safety”

LaserPointerSafety.com website, <http://www.laserpointersafety.com/LPSFiles/files.html>

*If you need the paper as it was presented at ILSC, you can look in the published “ILSC 2009 Conference Program Proceedings”, contact LIA (who ran ILSC) or contact ILDA.*
