Manufacturer-independent laser show subscriptions

Oberschleißheim / Munich, August 3rd, 2006. Since the end of July spectrabeam.de offers laser show subscriptions of all programmers and manufacturers who have a contract for the Pangolin LD2000 system.

„Long and hard negotiations were required, and now we are offering in addition to single laser shows the so-called showware, subscriptions of shows from all our manufacturers and programmers. I could convince them to agree to common laser show subscriptions. A milestone in our company's history.“, says owner Bernd Steinert. He continues:

„Our customers are on the safe side because payment is done monthly and not in advance for the whole subscription period. The subscriptions include all our showware and all music CDs, independent of programmer or manufacturer. Our customers can choose a show each month from our portfolio, which we continue to expand. In this way, there are no surprises regarding the show they get. If there isn't a suitable show in our offer, our customers can suspend the subscription for one month. Additionally, our customers decide at the end of the subscription period whether to extend the subscription or not; there is no deadline. I think, these conditions are unique in the market.“

spectrabeam.de offers Trial, Annual and XXL subscriptions which run for 6, 12 or 24 months. The discount on the list prices depends on the length of the subscription is 10, 20 or 30 per cent, respectively. The subscription discount applies also to any shows or music CDs that the customer may order additionally. The Trial and Annual subscriptions can be upgraded to Annual or XXL subscriptions anytime, with the passed

subscription period being accounted for. More information at www.spectrabeam.de or under 0049 – 89 – 53 24 86.

About spectrabeam.de

spectrabeam.de is the leading internet online shop for laser shows, the so-called showware. The offer ranges from ready-made shows for 70 Euro and more, for laser systems with a single scanner, to the premium range of big systems with three or more white light scanners. Our customers include discotheques and laser show organizers from America to Saudi-Arabia.

Each ready-made show can also be adapted to special wishes, and spectrabeam.de designs or arranges individually programmed beam- and graphics shows on demand. A specialty is the customized programming of animated 3-D graphics shows for special occasions using 3D Studio MAX.

Bernd Steiner offers to Programmers and manufacturers marketing and worldwide distribution of laser shows to customers who are professionals.
